PROFESSIONAL SUMMARY

I am process oriented and focused on building comprehensive solutions - composed of people, process, and tools to deal with business specific needs.

18+ years' experience in the Software industry, working on different stages of the software development life cycle. Possess deep and broad technical skills in Microsoft technologies and Azure cloud.

Comprehensive experience across functional domains, presales, support channels and all phases of IT development.

Currently working in a US based leading Healthcare firm - 'Multiplan, Inc' as a Technical Product Delivery Manager. Leading IT professionals to build a strong engineering foundation software that delivers positive business outcomes. Working with geographically distributed teams of 8-10 members in each project and handling multiple projects at same time.
